

PEDRO FABRINO

Mobile Engineer | Technical Lead (iOS, React Native & Mobile Architecture)

Brasília, Federal District • pfabrino@gmail.com • +55 61 98621-0308 • <https://www.linkedin.com/in/pedro-fabrino>

PROFESSIONAL SUMMARY

Mobile Engineer & Technical Lead with 12+ years of experience engineering high-impact mobile architectures across iOS (Swift, SwiftUI, Objective-C), React Native, and Flutter. Proven track record leading multi-disciplinary engineering teams, designing scalable mobile frameworks using MVVM, VIPER, and MVC patterns for enterprise automotive and entertainment leaders (BMW, Disney/Apply Digital), and automating developer infrastructure. Expert in mobile performance optimization, CI/CD pipelines, and cross-functional technical strategy.

WORK EXPERIENCE

Technical Lead — Ília

Jan 2023 – Present

Leading technical discovery, architecture, and sprint planning for international client applications, while driving developer platform initiatives and cross-team alignment.

- Spearheaded the architecture and delivery of an Internal Developer Platform (IDP) using Terraform, Docker, and AWS for a major German automotive OEM, reducing infrastructure provisioning time by 60%
- Orchestrated technical discovery, architectural blueprints, and effort estimation for 10+ enterprise mobile initiatives, achieving a 95% on-time sprint delivery rate across cross-functional teams
- Mentored and directed 12+ mobile and backend engineers, establishing standardized Swift/React Native code quality guidelines and automated CI/CD workflows

Senior Mobile Software Engineer — Apply Digital

Jan 2022 – Jan 2023

Led key mobile and tvOS development for a tier-1 entertainment client, architecting secure video streaming applications for iOS, iPadOS, and tvOS.

- Architected and rewrote core tvOS & iOS media streaming applications from legacy MVC and UIKit/UIView to MVVM and SwiftUI, improving app scalability, maintainability, and feature velocity by 35% for a global tier-1 entertainment company
- Engineered secure DRM-protected video streaming pipelines for pre-release theatrical content, maintaining 99.9% playback stability across iPad, iPhone, and Apple TV devices

Mobile Senior Developer — Ília

Mar 2020 – Feb 2022

Engineered high-performance cross-platform and native iOS applications using MVVM architecture with continuous delivery pipelines and junior developer mentorship.

- Architected and developed core features using MVVM for high-scale enterprise apps (UOWE / Warren) with React Native and Swift, serving 500k+ active users
- Reduced crash rates from >2.0% to <0.15% across production apps by introducing strict memory management and automated error tracking

Mobile Technical Leader — Ília

Nov 2017 – Mar 2020

Directed mobile development teams for flagship client apps, driving technical strategy, architecture (MVVM/VIPER), and Scrum alignment.

- Directed mobile architecture using MVVM and VIPER design patterns for major enterprise applications (Ticket, BMW Connected, BMW MLaptimer, BMW Mini, Livelio) in Swift and React Native, serving 1M+ active users
- Onboarded and mentored 15+ engineers, establishing mobile CI/CD pipelines (Fastlane, GitHub Actions) that accelerated release cycle times by 40%
- Aligned sprint goals directly with client executives and cross-functional teams using Agile/Scrum methodologies to ensure 100% transparent milestone delivery

Mobile Developer — Ília

Nov 2015 – Nov 2017

Built native iOS applications from concept to deployment using Objective-C, Swift, and MVC architecture.

- Engineered 6+ native iOS applications from scratch (Dokter, AulaUP, VetsGo, Sabin) using Objective-C and Swift, integrating RESTful APIs and local persistence
- Optimized UI layout responsiveness and resolved complex concurrency bugs across legacy Objective-C and UIKit codebases

Developer — BEPiD

Jan 2014 – Nov 2015

Selected for competitive iOS Developer Education program sponsored by Apple.

- Developed multiple prototype applications for iOS exploring early Objective-C framework design and mobile UI standards

TECHNICAL SKILLS

Mobile Architecture & Core: iOS (Swift, SwiftUI, Objective-C, UIKit), Architecture Patterns (MVVM, VIPER, MVC), React Native, Flutter, tvOS, Mobile System Design, Performance Optimization

Leadership & Strategy: Technical Lead, Team Mentorship, Cross-Functional Collaboration, Code Review Standards, Developer Experience (DevEx), Agile/Scrum

Cloud, DevOps & Infrastructure: Internal Developer Platforms (IDP), AWS, Docker, Terraform, CI/CD (Fastlane, GitHub Actions), Automated Testing

Web Development: Vue.js, Node.js, Nest.js

CERTIFICATIONS

C2 Proficiency - English Certificate — EF SET (2023)
